

# King Covered Bridge

Bridge Number: 30 7219 0371 2038

Built in 1890 & restored in 2005

**KING BRIDGE**

On June 16, 2005, the Greene County Board of Commissioners held a Ribbon Cutting Dedication Ceremony at the Woods Covered Bridge located in Center Township, and the King Covered Bridge, located in Wayne Township. The dedication ceremony for both bridges took place at the Woods Covered Bridge, on Oak Forest Road and Woods Road, in Center Township. Both the bridges were recently restored while preserving as much as possible of the original structures.

With a few boards missing here and there on the sides, this rustic bridge is covered with unpainted random-width vertical board siding. The roof is covered with steel metal and the deck with crosswise planking. The structure of the bridge rests on cut stone abutments, which are extended to form short wingwalls slightly higher than the road level. It has the typical narrow lengthwise openings under the eaves. Simple, one-span, non-composite, steel T-Beam construction. Open to vehicular traffic with the average three-ton weight limit.

Crosses over the Hoover Run waterway, located north of Brave in Wayne Township, Greene County, Pennsylvania.
